Wrapid Fit | Wraptor Zip

Our unique Wrapid Fit PFD entry system provides side entry convenience, with vest sized pockets. Fitting is simple:

1. Loosen all webbing adjusters and undo all buckles. Adjust shoulder straps to the desired length.

2. Place the PFD over your head, secure the Internal Secure Wrap System - extended wing panels of the rear of the PFD are connected at the front with a single large torso clip, adjust to the desired fit.

3. Zip the front up and secure the chest clip. Increase tension of the side straps by pulling forward from the rear tensioners.
